Professors and researchers serving at foreign universities who hold an academic position corresponding to that of professor or researcher, as defined by the relevant Ministerial Decree, may also be appointed.
The appointment of the Selection Committee is made public by publication on the website of the University of Gastronomic Sciences.
The Committee appoints from among its members a Chair and a Secretary responsible for the minutes.
The Committee may use telematic tools for collective work. The Committee carries out its work in the presence of all members and adopts its decisions by an absolute majority of its members.
From the date of publication of the Rector's Decree appointing the Selection Committee, a peremptory period of 10 days begins for candidates to submit any requests for recusal of committee members to the Rector. Once that period has expired, and in any case after the Committee has taken office, no requests for recusal of committee members will be accepted. The rejection of a request for recusal cannot subsequently be invoked as grounds for recusal.
The Committee must conclude its work within 90 days from the date of publication of the Rector's Decree appointing it. The Rector may extend the deadline for the conclusion of the procedure only once and by no more than 30 days, for proven and exceptional reasons reported by the Chair of the Committee. If the work has not been concluded after the extension, the Rector, by reasoned decision, shall start the procedures for replacing the members responsible for the delay, at the same time setting a new deadline for the conclusion of the work.

Article 10 – Evaluation procedure

The Committee carries out the comparative evaluation of the candidates, which is intended to assess whether the candidates possess a scientific and professional curriculum suitable for carrying out the research activity covered by the contract.

Definition of the evaluation criteria

At its first meeting and before examining the applications, the Committee establishes the general criteria for the evaluation of qualifications, publications and the interview and makes them known by publication on the website (https://www.unisg.it/contratti-di-ricerca/).

Evaluation of candidates

Once the evaluation has been completed, the Committee collectively expresses, for each candidate, a reasoned overall assessment and the corresponding score.

Interview

The list of candidates admitted to the interview and its schedule, with the indication of venue and time, will be made known by publication on the website (https://www.unisg.it/contratti-di-ricerca/). **Publication of the notice on the University website shall constitute legal notification of the call for the tests. The absence of the candidate will be considered as a withdrawal from the comparative evaluation regardless of the cause.**

The Committee may decide that the interview will be conducted online via remote methods, giving notice to the candidates at the time of indicating the venue and time of the interview, as specified above.

In any case, foreign candidates residing outside Italy and candidates residing more than 200 km from the venue of the selection may take the interview by video conference, subject to the consent of the Selection Committee and verification of technical feasibility.

For the interview, candidates must be in possession of a valid identity document.

The interview is intended to assess the candidate's suitability to carry out the research activity covered by the research contract, as well as knowledge of English and/or other languages relevant to the research.

The interview will be conducted in English and may also be conducted in Italian if the candidate has declared knowledge of it.

The interview is public.

Article 11 - Merit ranking

At the end of the evaluation, the Committee draws up a merit ranking taking into account the scores obtained by the candidates and identifies the winner of the selection.

The merit ranking drawn up by the Selection Committee is approved by the Rector at the same time as the issuing of the Rectoral Decree approving the proceedings.

The research contract covered by this comparative evaluation procedure is conferred on the candidate ranked first in the merit ranking.

If the candidate ranked first in the merit ranking renounces the research contract, the Academic Council may propose to the Executive Committee that it be awarded to the candidates ranked immediately below.

In order to ensure adequate publicity of the above ranking, it will be published on the website https://www.unisg.it/contratti-di-ricerca/.

Article 12 - Conferral of the research contract

The conferral of the research contract is formalised by the signing of a private-law subordinate employment contract between the University of Gastronomic Sciences and the winner of the comparative evaluation procedure. The contracts constitute a fixed-term subordinate employment relationship and do not give rise to any right of access to the permanent staff of the University.
Pursuant to Article 46 of Presidential Decree No. 445/2000, the winner is invited to self-certify the following personal states, facts and qualities:

a) birth certificate;
b) residence;
c) citizenship;
d) possession of a tax code and the relevant number, if any.

At the time of signing the contract, the winner of the research contract shall sign a declaration that they possess the requirements for admission to the selection. If employed by a public administration, they must also declare that they have been placed on unpaid leave.
The personal states, facts and qualities self-certified by the winner of this selection procedure shall be subject to suitable checks by the University of Gastronomic Sciences, including random checks, as to their truthfulness.
The personal data provided by candidates with their applications for participation in the selection procedure, pursuant to the GDPR and Legislative Decree No. 196/2003, shall be processed exclusively for the purposes of managing this procedure and any procedures for the award of the contracts in question.
The winner of this selection procedure shall comply with the obligations set out in the "University Regulations for the conferral of research contracts", available on the University website.
The research contract starts from the date indicated in the contract.
Those who, within the time limit set by the administration, do not declare that they accept the research contract or do not take up service within the established time limit shall forfeit their right to the research contract. Postponements of the start date or interruptions of the research contract will be granted to winners who prove that they are in the conditions provided for working mothers (Legislative Decree No. 151 of 26 March 2001).

Article 13 - Activities of the holder of the research contract

The holder of the research contract is required to carry out their activities in accordance with Article 13 – Rights and duties of the holder of the research contract of the Regulations for the conferral of research contracts.

Article 14 - Intellectual property of research results

All research results, whether or not eligible for exclusive rights, shall be the property of the University, which shall have full and exclusive authority to exploit, use and/or publish them, without prejudice to the moral rights of the inventor/author.

Article 15 - Evaluation of the activity of the holder of the research contract

The holder of the research contract is required to submit every six months to the Academic Council a detailed report on the activities carried out and the results achieved, accompanied by the opinion of the Scientific Supervisor.

On the basis of this report, the Academic Council expresses an assessment of the research activity carried out by the holder of the contract, which will be acquired by the Executive Committee for the purposes of the resolution on any renewal of the research contract.

Article 16 – Compatibility, incompatibility and prohibition of concurrent appointments

Research contracts are incompatible with:

- any other subordinate employment relationship, including part-time or fixed-term, with public or private entities;
- holding research grants (assegni di ricerca), including at other universities or public research institutions;
- scholarships or research grants awarded on any basis by Italian or foreign institutions, except those exclusively aimed at international mobility for research purposes, including the PhD scholarship and the emoluments related to the medical specialisation contract.

The research contract is not compatible with attendance of or enrolment in bachelor's, specialist or master's degree programmes, PhD programmes or specialisation schools, in Italy or abroad, and entails unpaid leave for employees of public administrations.

In any case, the holder of the research contract may not carry out activities that may give rise to a conflict of interest with the University's activities or that may prevent the regular performance of the research activity.

For the purposes of the prohibitions on concurrent appointments and the incompatibilities referred to in this Article, upon signing the contract the winner shall submit a declaration in lieu of an affidavit and undertake to notify the relevant University office of any change in the circumstances declared, as soon as that change occurs.

Article 17 - Termination of the relationship

Breach by the holder of the research contract, pursuant to Articles 1453 et seq. and Article 2119 (just cause) of the Civil Code, reported and justified by the Scientific Supervisor to the Academic Council, constitutes grounds for termination of the relationship.

The resolution terminating the relationship is adopted by the Executive Committee.

The relationship terminates automatically upon expiry of the term provided for in the contract or if the research contract is not renewed by the Executive Committee.

Further grounds for termination of the research contract are the annulment of the comparative evaluation procedure and the supervening impossibility of continuing the research activity.

For matters not expressly governed by this Article, the provisions of Article 16 – Grounds for termination of the employment relationship of the Regulations for the conferral of research contracts shall apply.

Article 18 - Publication
