

CITTA' DI BRA  
PROVINCIA DI CUNEO

To all the people living in Bra

It's probably the first time the members of the town council all together decide to send a message to our citizens. But it's the first time we are facing an out of the ordinary situation like the one that sees us together fighting against the virus COVID-19.

We are going through one of the most difficult times of our cohabitation and we can overcome it if everyone does what is required to do. We must respect all the regulations issued by our government. The only and little part we are asked to do is to stay at home.

We all would like to have nice walks along our avenues, down the slopes of the hills surrounding Bra, or in our countryside. We all would like to cycle and enjoy our town without any traffic. This would be wonderful, but not now. Now we have to stay at home.

We are asking you to stay at home because we take care of your health and the one of your and our beloved ones, especially those who are at risk like elderly and sick people.

The most efficient weapon we have now is limiting our movements, apart from those absolutely necessary.

For this reason, we ask all the Braidesi to strictly adhere to the regulations and recommendations issued by our government and health authorities. Our forefathers went to war to protect the things most dear to them. We are only asked to stay at home.

Please share this message to all the people you know in Bra.
